

# CASEY PORT, LEED-AP

VICE PRESIDENT

“I focus my efforts on client satisfaction. Being able to provide value for the client is my reward. It is my job to anticipate potential obstacles and provide the best possible solution for the client.”

Casey Port brings more than 20 years of construction and development management experience to Hubbell Construction Services. He has extensive experience in commercial construction, historic renovations and tenant improvement construction. Casey manages projects from the conceptual stage through punch-list and warranty activities. He has been intimately involved in all of Hubbell’s historic renovation projects, including spearheading Hubbell’s historic project Spaulding Lofts in Grinnell, Iowa, which is a conversion of two historic buildings into 77 apartments.

Appointed Vice President in 2013, Casey has responsibility for all Hubbell Construction Services operations and business development.
